

To Anna Gray Med. Dr. Utica Gymnasium
Care of Eliza Packard No 184 Wallstreet New York

Botanischer Garten zu Hamburg

den 10^{ten} Septemb. 1835.

Dear Sir!

The parcels which you addressed to me for Prof. Nees von Esenbeck and Prof. von Schlechtendal have been forwarded without delay.

Prof. Nees von Esenbeck acknowledging the receipt of the mentioned parcel tells me, that he rejoiced very much at the contents of the same, and that as soon as time will allow it, he intends to answer both to You and Dr. Torrey and to make a sending in return. He is now occupied with a *Agrostographia promont. Bonae Spei.*

It is with particular satisfaction, that I transmit You inclosed by desire of the Leopoldinian-Carolinian Academy and of her President, the Diplomata of the said Academy destined for You and Dr. Torrey. Thus I dare now claim the pleasure to greet You both as my esteemed colleagues.

I have the honour to sign with the most perfect esteem

Dear Sir Your most obliged,

Lehmann

P.S.

There are wanting in my Set. of Nordamerican gramineae and Cyperaceae the numbers 55, 55, 114 and 169. Will you have the kindness to complet. it, by sending me occasionally these specimens.
